**Search tips**

- Make sure that all words are spelled correctly.
- Try selecting a different scope from the options near the search box.
- Try different or more general keywords.
- Try fewer keywords.
- Ask a librarian for assistance.

## Final step

VBA macro:

- Saves the databases and websites spreadsheets as separate upload files
- Removes all formulae, leaving only text values in cells
- Removes any row that has no tags
- Saves a back up copy of each file

Output result is two Excel upload files which can be loaded directly into the Primo Back Office with no further adjustment required.

## Next steps

Assess the impact of the May release “tag enrichment” on recommendations

Extend the spreadsheet to include Research guides and A-Z Database subjects

Apply additional error checking to the Final step macro

Investigate ways to allow other librarians to work with the tags while keeping track of changes
