

ANZREG seminar, UTS, 23 January 2009

Verde Product Working Group Update – from Andreas Sabisch, PWG Co-ordinator

Simon Huggard

Activities

- **Ongoing monthly PWG phone calls**
- **Discussions at ALA 20-23 January (mtgs with PWG, EL Product Manager, IGeLU and ELUNA).**
- **Discussion with Netti Legace (Product Manager) about the update Webinar – but no response yet**
- **Discussion about Q & A session from Madrid conference (nothing to report yet)**

Activities

- **PWG has a discussion about CKB-issues with the SFX and Metalib people - more discussion at ALA as well.**
- **Further discussion about communication with Ex Libris and the user group about Verde changes.**

Future directions of the software

- **With the future releases it looks like Verde will improve and become more productive. This is visible in discussion on the VERDE-L list, and also from some discussions with ExL staff.**
- **ExL have had some internal discussion about the next steps (SFX4/CKB/VERDE3; URM1) but have not talked clearly about these issues with us.**

Voting

- **Voting round will probably start in February (it depends on some open points)**

A request to Verde users at ANZREG:

- **I would be very happy if some of the people from the National Group will be interested in strong contact with me (and maybe with doing some work for the IGELU PWG).**
