

API – Library Search

Kevin Lin, ANZREG 2017, Monash University Caulfield Campus Library

Library search

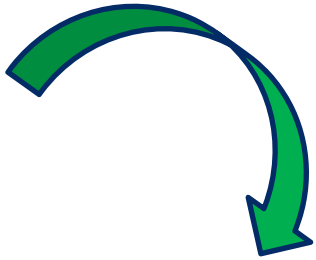

Library website redesign started 2015 with the following focus

Easier navigation and access to content

- Reflect Library services and self-service
- Full search
- Responsive design
- Consistent and seamless appearance
 - Integrated services
- Extendable and easy to update

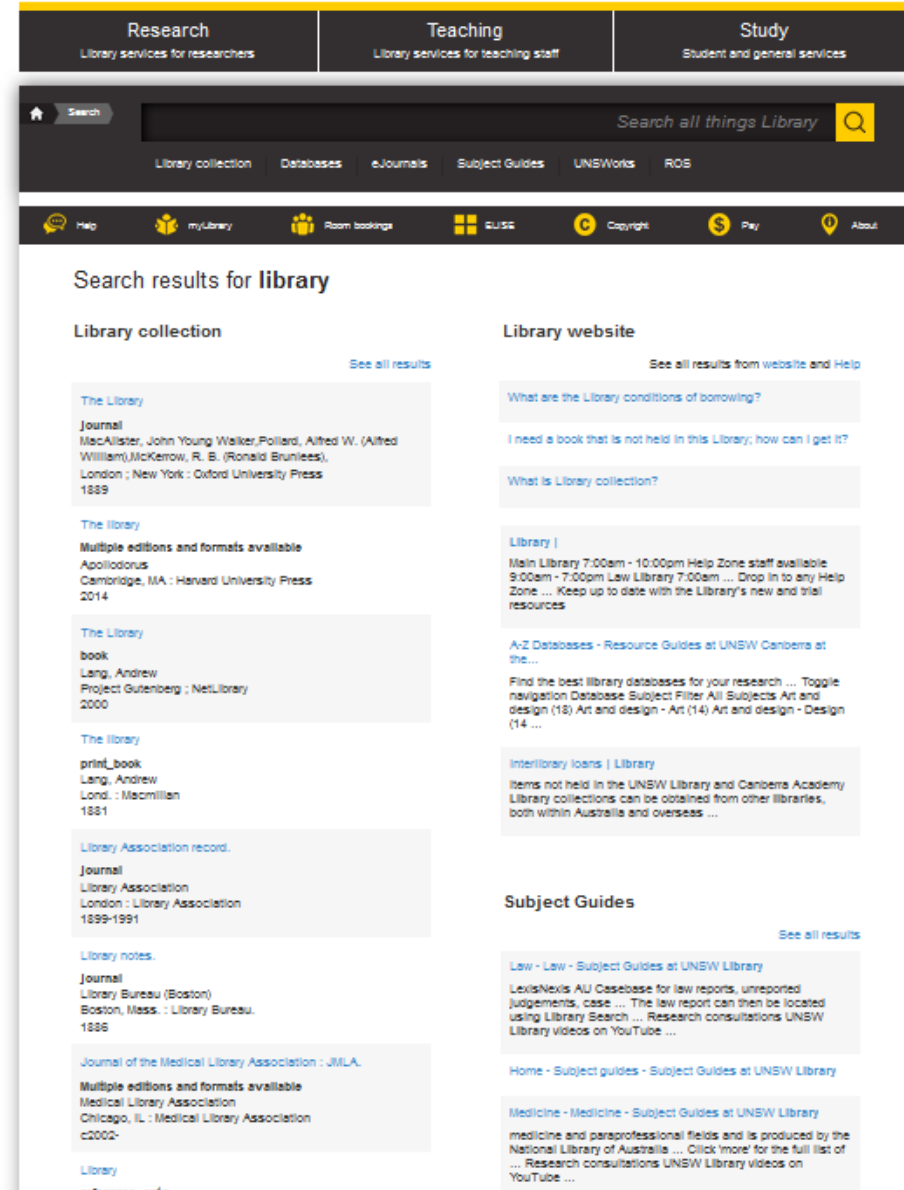

Library web site

The image displays two versions of the UNSW Library website. The left version is a desktop view with a top navigation bar containing links like Home, Search tools, and Borrowing. Below this is a search bar and a sidebar with categories such as 'How do I find', 'Borrowing', and 'Support'. A banner at the bottom of the sidebar promotes a new Postgraduate Study Space. The right version is a mobile view with a simplified top navigation bar featuring 'Research', 'Teaching', and 'Study' sections. It includes a search bar and a list of resources like 'Library collection' and 'Databases'. A large 'ORCID' banner is prominent, encouraging users to add their ORCID ID to ROS. At the bottom, there are social media links for Twitter and Facebook, and a 'statista' advertisement.

Library search

 - » First 5 results
 - Can't find it

The screenshot shows the UNSW Library search results page for the query 'library'. The page is divided into three main sections: 'Library collection', 'Library website', and 'Subject Guides'. Each section has a 'See all results' link. The 'Library collection' section lists several items, including 'The Library' (Journal), 'The library' (Multiple editions and formats available), 'The library' (book), 'The library' (print_book), 'Library Association record.' (Journal), 'Library notes.' (Journal), and 'Journal of the Medical Library Association : JMLA.' (Multiple editions and formats available). The 'Library website' section lists several links, including 'What are the Library conditions of borrowing?', 'I need a book that is not held in this Library; how can I get it?', 'What is Library collection?', 'Library |', 'A-Z Databases - Resource Guides at UNSW Canberra at the...', 'Find the best library databases for your research ... Toggle navigation Database Subject Filter All Subjects Art and design (18) Art and design - Art (14) Art and design - Design (14) ...', 'Interlibrary loans | Library', and 'Items not held in the UNSW Library and Canberra Academy Library collections can be obtained from other libraries, both within Australia and overseas ...'. The 'Subject Guides' section has a 'See all results' link and lists several guides, including 'Law - Law - Subject Guides at UNSW Library', 'Home - Subject guides - Subject Guides at UNSW Library', and 'Medicine - Medicine - Subject Guides at UNSW Library'. The page also features a navigation bar at the top with 'Research', 'Teaching', and 'Study' tabs, and a search bar at the top right.

The library

Apollodorus, author. ; James George Frazer Sir, 1854-1941, translator.

[See all editions and formats](#)

Actions

Title: The library

Author: Apollodorus, author.

[James George Frazer Sir, 1854-1941, translator.](#)

Subjects: [Frazer, James George, Sir, 1854-1941, ed. and tr](#)

Description: v. I. Books 1-3.9 -- v. II. Book 3.10-end. Epitome.

Text in Greek with English translation on facing pages.

Attributed to Apollodorus of Athens (born c. 180 BCE), but probably composed in the first or second century BCE, the Library provides a grand summary of Greek myths and heroic legends about the origin and early history of the world and of the Hellenic people. The Library provides in three books a grand summary of traditional Greek mythology and heroic legends. Written in clear and unaffected style, the compendium faithfully follows the Greek literary sources. It is thus an important record of Greek accounts of the origin and early history of the world and their race. This work has been attributed to Apollodorus of Athens (born c. 180 BCE), a student of Aristarchus. But the text as we have it was written by an author probably living in the first or second century of our era. In his highly valued notes to the Loeb Classical Library edition (which is in two volumes) J. G. Frazer cites the principal passages of other ancient writers where each particular story is told and compares the various versions to those in the Library.

Related Titles: Series: Loeb Classical Library ; 121-122.

Ex Libris Support

- Very supportive with EDN

The screenshot shows a forum thread on Ex Libris support. The main thread is titled "How to search Primo Central with Primo REST API?". It contains three posts:

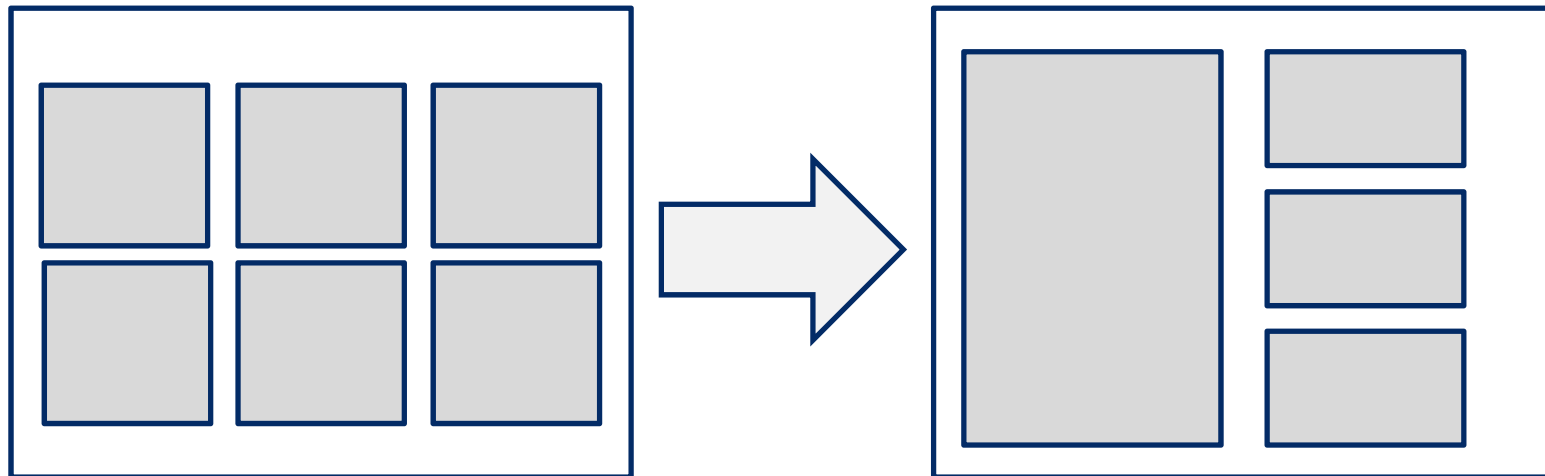

- Post 1:** Author: 01NWU_INST (5 stars). Subject: "How to search Primo Central with Primo REST API?". Message: "Is it possible to search Primo Central engine (&q=facet_level,exact,online_resources_PC_T &loc=adaptor,primo_central_multiple_fe Jason".
- Post 2:** Author: bhecht (5 stars). Subject: "Re:How to search Primo Central with Pri". Message: "If you are referring to this: <https://developers.ex> something like scope=PC, it depends on the n Thanks".
- Post 3:** Author: CKARPI (5 stars). Subject: "Help with Primo REST / PNX?". Message: "I have some questions – the last one might be account specific."
A) What's the plan with XServices vs PNX?
Is XServices being retired soon?
If so, when?
I have to release a new product in the next month or so, but would rather not pick the 'old / stable' tech if it's going to be reti
B) How "ready for live" is the REST PNX Service?
It still says "beta" and the documentation isn't as full as the XServices one. But a colleague suggests it's almost ready for l
Is it ready now? In the next month?
I'd rather not do a production product with a Beta back-end that's still being refined.

Problems and issues

- Original design
 - 3 x 2 – 6 boxes
 - » by resource types
 - Books, journals and media
 - Articles and chapters
 - Other resources – databases, etc.
 - 5 results per box

Problems and issues, cont'd

- Undocumented changes – Changes/updates to Primo API not documented in release notes
- Element titles appear inside the JSON differ from Primo FE brief result, e.g. creator in json extract from PNX /addinfo/au. Unpublished document for these mappings - PNX JSON-LD Context (public) UpdatedV2.docx
- API Analytics or Primo Analytics not sufficient – primitive, search terms not present, does not differentiate source or destination
- Exposure of the use of the API key – local solution
- Deep links to PC results

The End
