Drivers for the re-design of e-resource workflows: focus on Primo

Annette Schryver Macquarie University Australia

Macquarie University Primo

History

- Primo was implemented in 2011

- Moved to new building in 2011

- Implemented the ASRS in 2011

History

- Total Care customer

- WebVoyage OPAC still in use
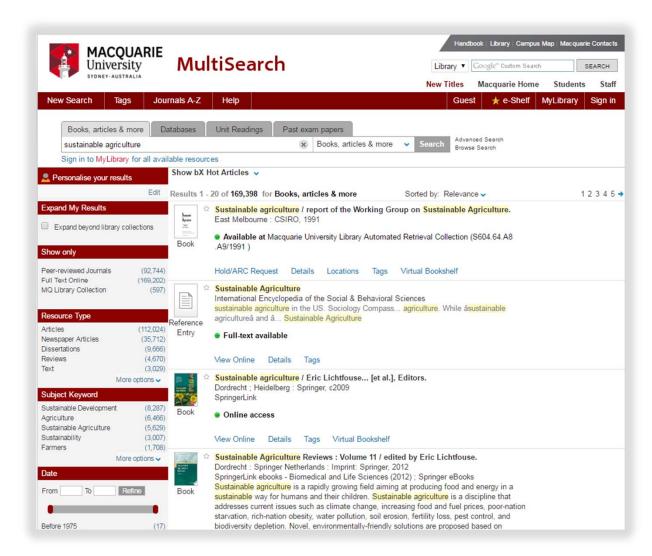

- Databases list

- Journal Finder

- New Books list

MultiSearch

one-stop search across Library resources

[　　　　　　　　　　　] [Search] ?

Catalogue   Databases   e-Reserve   Journal Finder

- Alma Project underway – end of opac coming

- Redevelopment of Primo
    1. "Makeover"
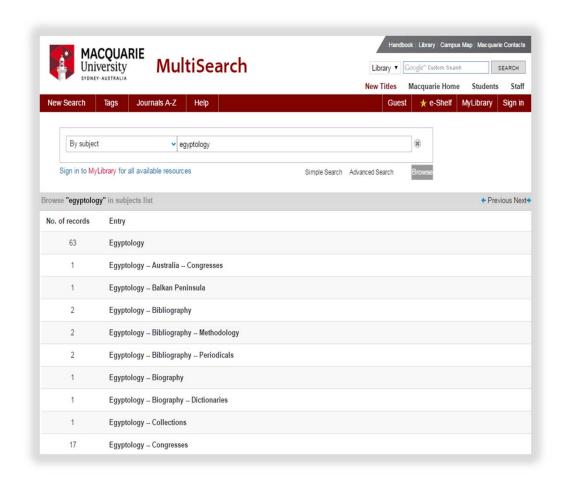

"After"

Redevelopment of Primo

2. Added Browse Searching

3. Configured Virtual Bookshelf

browse ARC material

interfiles open shelves, ARC & electronic resources
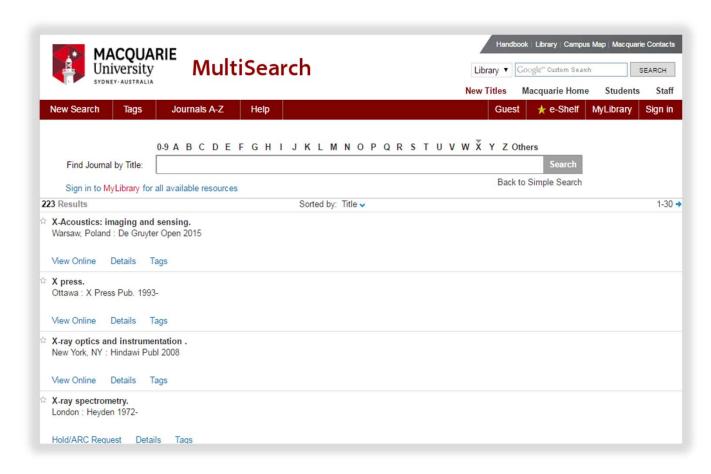

Virtual Bookshelf

- easy from Voyager – all records had a HOL record

- change for Alma as no HOL records for e records

- use 050 field in browse call number NR for e records

Redevelopment of Primo

3. Journals list

(includes both p & e)
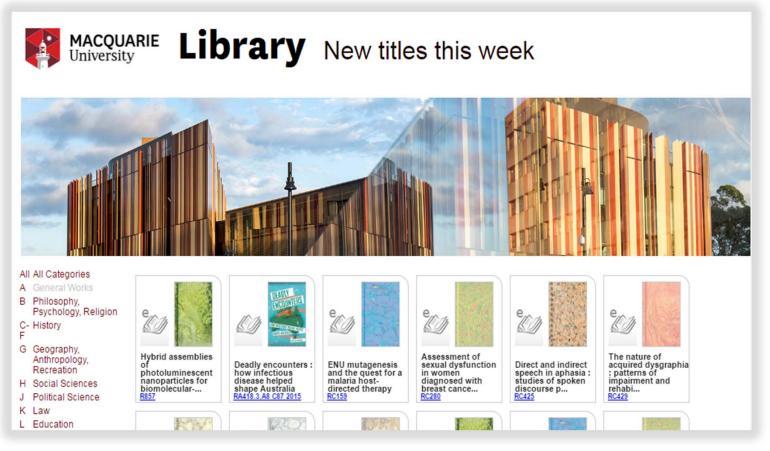

Redevelopment of Primo

4. New Titles

New Titles List

- Uses daily analytics reports

    p received last 3-10 days

    e activated last 1-7 days

- p&e lists merged into one New Titles List

- Issue: analytics only had "top level" classification, so NR to copy 050 into 950 which is a Local Param field in analytics

Drivers for the re-design of e-resource workflows: focus on Primo

Lachlan Young University of South Australia

UniSA: new to Primo
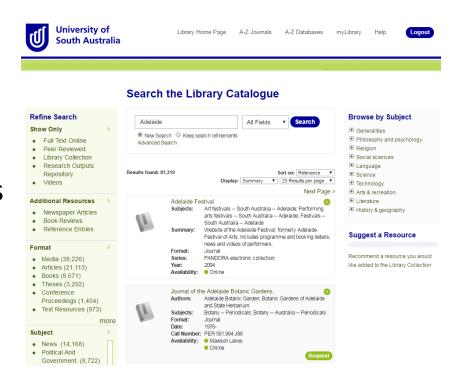

- Previously used Summon as a unified discovery layer

- Transition to Primo as part of Alma migration

- How to provide a consistent user experience during this transition?

Solution: custom interface

- Library Catalogue interface introduced a year before migration

- Used APIs to access both Summon and Primo search data

- Allowed flexibility during transition – and after

Research Outputs Repository

- Metadata stored in Alma

- Primo: search scope and custom fields

- Repository-specific interface

- Display of custom fields: funding information, embargo, citation counts

- Interface also connects to a third-party API to show altmetrics

Effect of Primary Care-based Education on Reassurance in Patients with Acute Low Back Pain : A Systematic Review ad Meta-analysis :

The Library is responsible for several Archival Collections, which provide a rich source of information on Australia's political, social and public health history. Collections focus on prominent South Australians, including Bob Hawke, the first Prime Minister of Australia born in South Australia. They aim to support research and education for UniSA's students and staff and the wider community.

Details of the contents of the Archival Collections can be found here along with digitised copies of selected items.

The UniSA Library web site also contains further information regarding the Archival Collections and the Bob Hawke Prime Ministerial Library facilities.

Issues

PCI

Activating all of the collections we have subscriptions to will swamp results

Why are local holdings not picked up from Alma as well?

Need greater transparency in when and what data is provided

Discussion

What do you think?

What tips could you pass on?

What do we need to pass on to Ex Libris?
