

Optimizing workflows and utilising Alma APIs to manage our Institutional Repository in Alma Digital

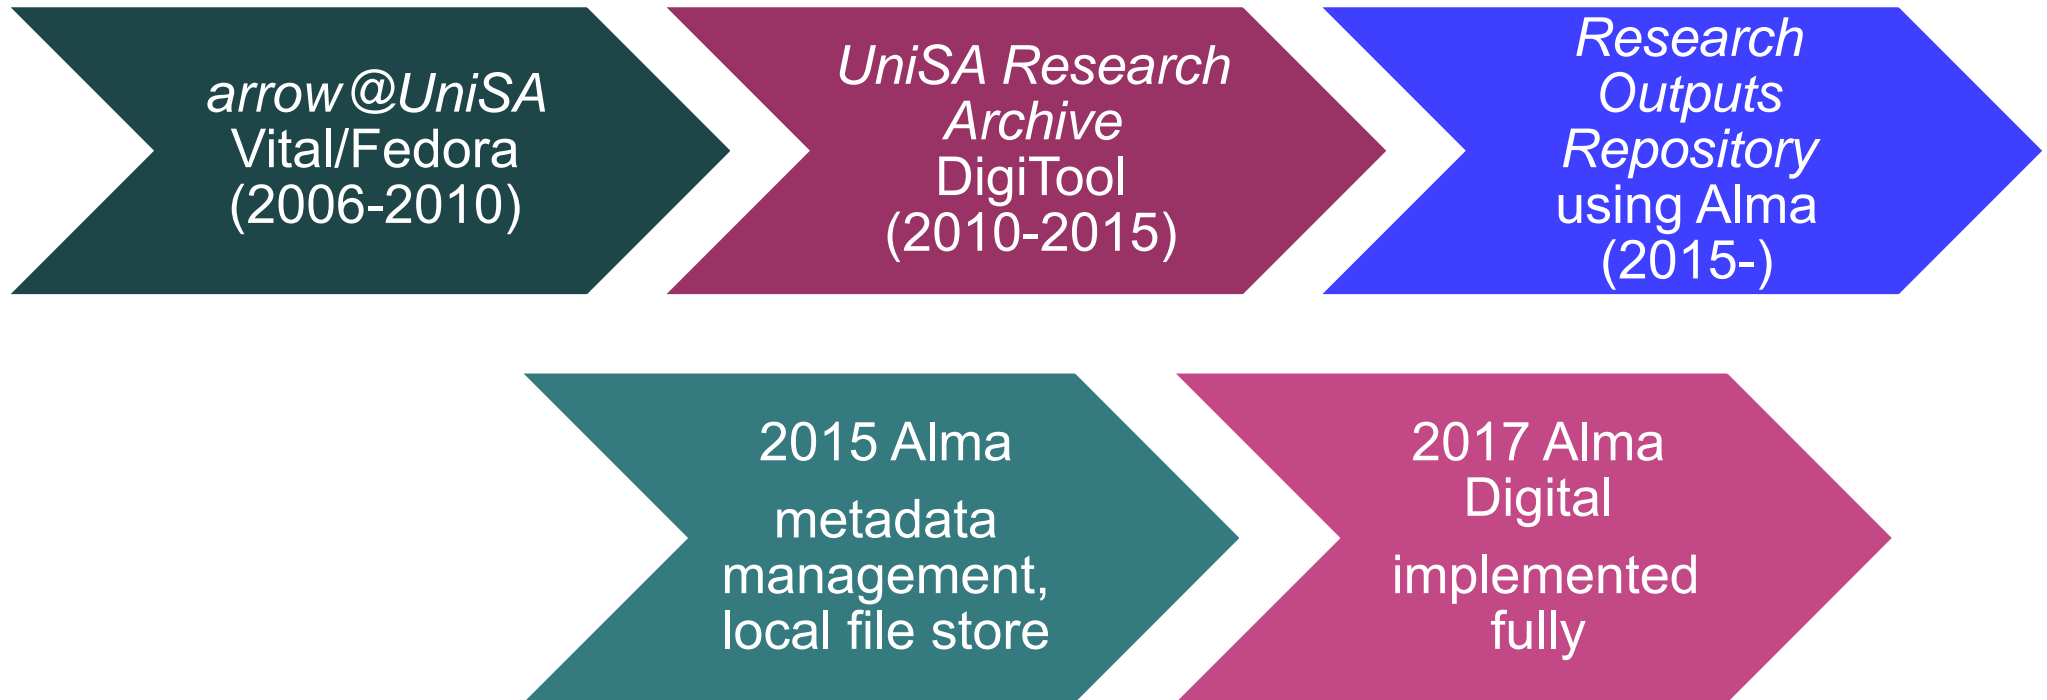

ANZREG Conference 2018

Kate Sergeant
Repository Services Coordinator

University of
South Australia

Institutional Repositories at UniSA

Using Alma for our Institutional Repository

Services Dashboard

Phase 1

- Handle generation
- File management

Phase 2

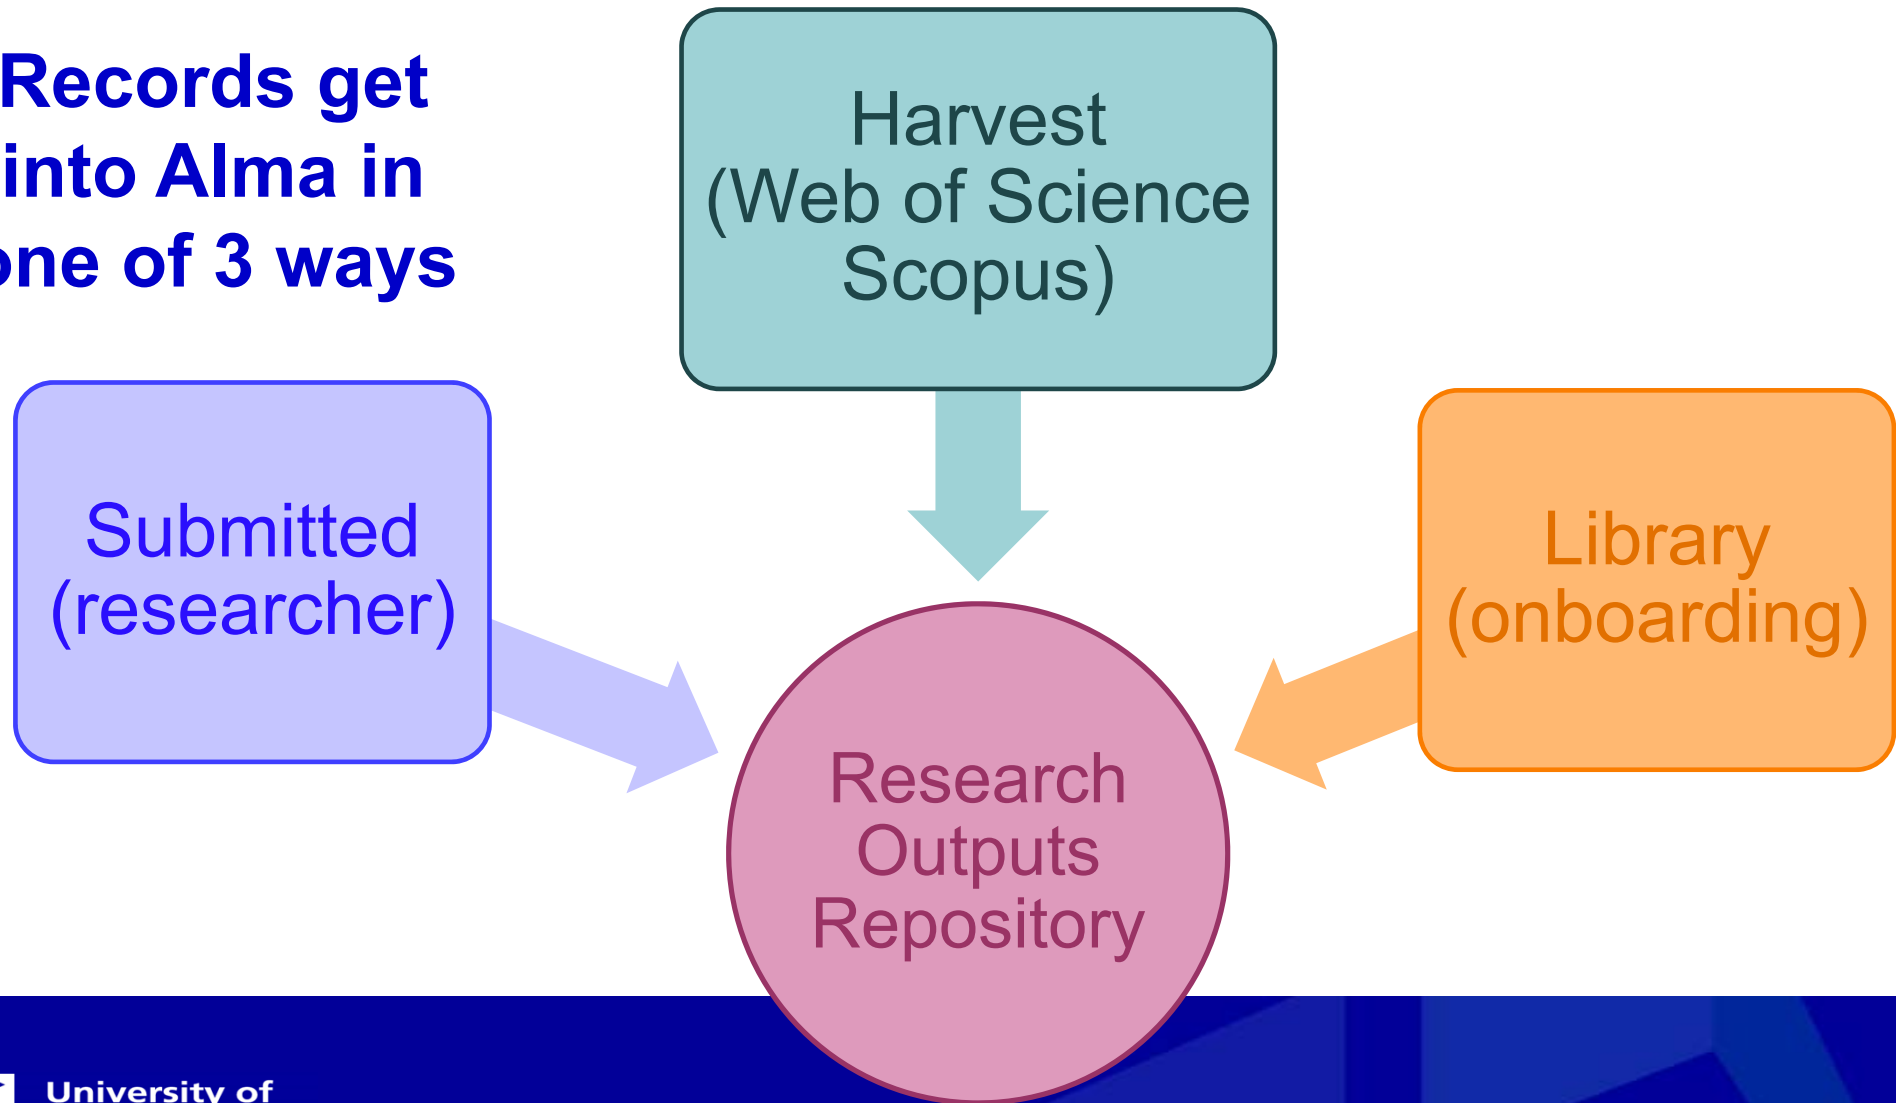

- Acknowledgement email generation

Phase 3

- Workflow management
- Data validation and verification
- Author management
- Licencing integrated into file management
- Data quality tools

**Records get
into Alma in
one of 3 ways**

The **i** icon pulls information from the University HR system.

It also includes a link to the author's staff home page on the University's website, where we can check and verify details.

The screenshot shows the staff profile page for Miss Cathy Mahar. The header includes the University of South Australia logo and navigation links for STUDY, RESEARCH, PARTNER, and NEWS & EVENTS. The profile information is as follows:

- Miss Cathy Mahar** (with a settings gear icon)
- Research Connections Librarian [University Library](#)
- Mawson Lakes Campus (C2-21) tel +61 8 830 26361
- email Cathryn.Mahar@unisa.edu.au

The "About me" section features a photo of Cathy Mahar and text describing her roles:

As Research Connections Librarian, Cathy has a variety of roles with a focus on:

- promoting the UniSA [Open Access Policy](#), to maximise the visibility of UniSA's research via the [Research Outputs Repository](#)
- ensuring staff and students use the new [Collection of Research Outputs](#) online submission system to submit their research outputs, including publications, patents, theses, and non-

On the right, there is a "Tweets by @UniversitySA" section showing a tweet from UniSA Newsroom (@UniSAnewsroom) dated 14 June 2018, 6 – 7:15pm, discussing gender diversity in senior leadership.

3. File Representations

Representations (File Uploads)

Add Representation

Type:

Access Rights

Open Access Restricted Administration Embargoed

Label: Public note:

Add File

No file chosen

Label:

We create digital representations in the dashboard rather than Alma so we can apply a controlled vocabulary to repository file labels.

Another advantage is it is quicker because the form only contains the details we need to populate.

We also pull information about archiving permissions from the licencing module in Alma.

Files uploaded via CRO (appian)

no files found

Licence Info

Close [X]

Title Searched: Communications in Soil Science and Plant Analysis

Taylor & Francis:

Repository Author Archiving Rights **Green open access**

Repository Version for Archiving **Accepted manuscript (not early online release)**

Repository Embargo Period **18 months**

Copyright Spreadsheet

Sherpa ISSN

Sherpa Title

Add File

Choose File ExportedReport (1).pdf

Create representation / Add file

ExportedReport (1).pdf -- 196.O76171875

The padlock and pencil icon opens the licence information text box. If there is archiving information in the licencing module in Alma it is displayed clearly at point of use. For some titles we can attach the licence information to the electronic collection licence. For collections where the publisher condition varies between titles, we have added the specific archive embargoes to the title licence as a batch job. We also link to Sherpa (another canned search) and to our local spreadsheet for when there is no information in Alma.

3. File Representations

Representations (File Uploads)

Creating a digital representation is easy, fill out the form and either browse to the file or drag and drop.

Check

Subject:

New research output added to Research Outputs Repository – Accepted Manuscript required

Delay: 6 Hours ▾ *(email will be delivered after the duration selected)*

Tip: you can also enter semi-colon separated username(s) and use the check button to look up and verify an email address

Email Body:

Dear Jenny Quilliam,

The following research output by you has been added to the [Research Outputs Repository](http://researchoutputs.unisa.edu.au/11541.2/130749)
<http://researchoutputs.unisa.edu.au/11541.2/130749>

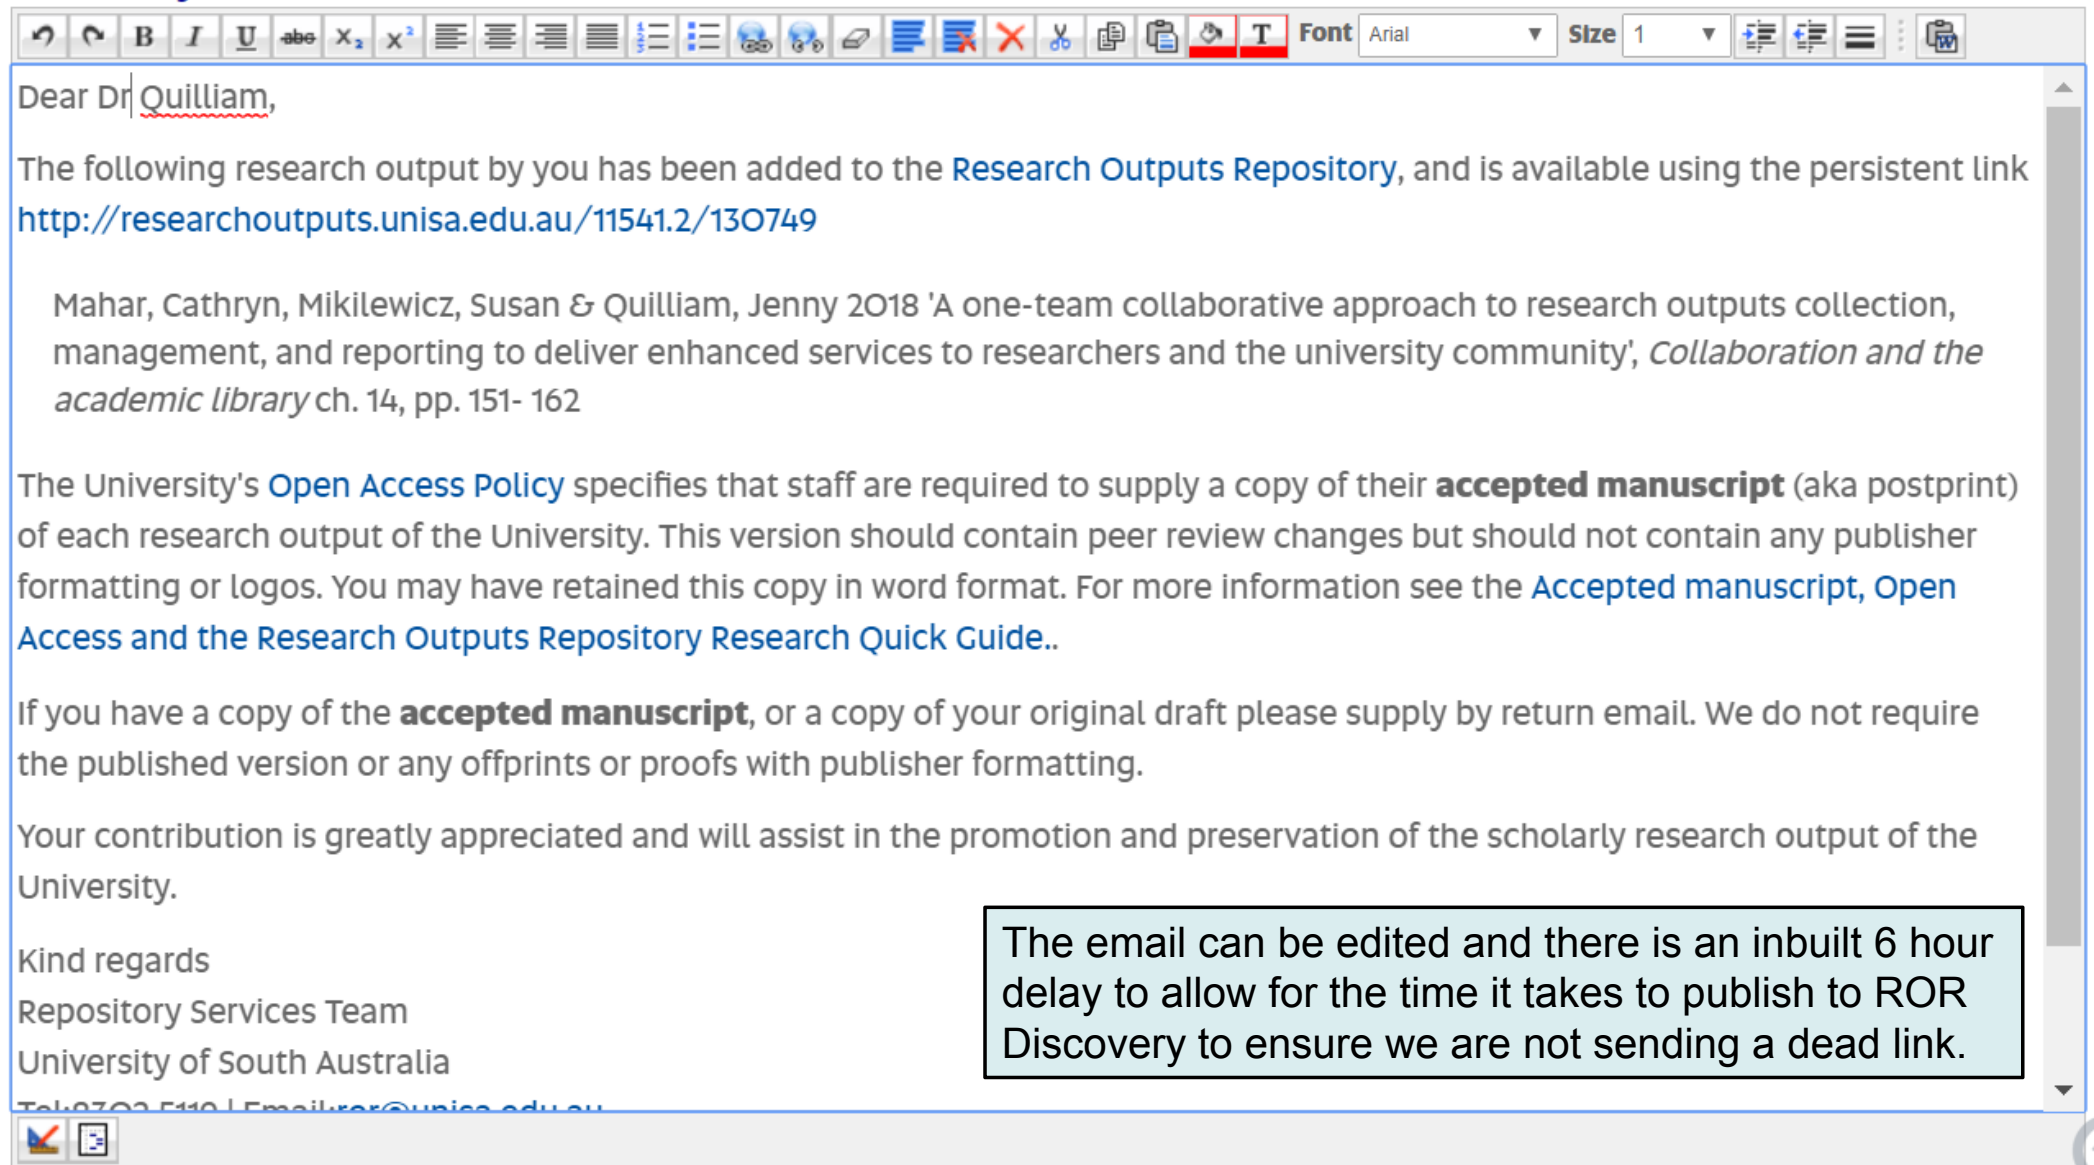

Mahar, Cathryn, Mikilewicz, Susan & Quilliam, Jenny 2018 'A one-team approach to research management, and reporting to deliver enhanced services to research users' *Academic library* ch. 14, pp. 151- 162

The University's [Open Access Policy](#) specifies that staff are required to supply a copy of their **accepted manuscript** (aka postprint) of each research output of the University. This version should contain peer review changes but should not contain any publisher formatting or logos. You may have retained this copy in word format. For more information see the [Accepted manuscript, Open Access and the Research Outputs Repository Research Quick Guide](#)..

The dashboard allows us to easily notify the researcher that their output has been processed. An email is generated from a choice of templates - all include the citation and link to ROR discovery from the Alma record.

Email Body:

Dear Dr Quilliam,

The following research output by you has been added to the [Research Outputs Repository](#), and is available using the persistent link <http://researchoutputs.unisa.edu.au/11541.2/130749>

Mahar, Cathryn, Mikilewicz, Susan & Quilliam, Jenny 2018 'A one-team collaborative approach to research outputs collection, management, and reporting to deliver enhanced services to researchers and the university community', *Collaboration and the academic library* ch. 14, pp. 151- 162

The University's [Open Access Policy](#) specifies that staff are required to supply a copy of their **accepted manuscript** (aka postprint) of each research output of the University. This version should contain peer review changes but should not contain any publisher formatting or logos. You may have retained this copy in word format. For more information see the [Accepted manuscript, Open Access and the Research Outputs Repository Research Quick Guide](#)..

If you have a copy of the **accepted manuscript**, or a copy of your original draft please supply by return email. We do not require the published version or any offprints or proofs with publisher formatting.

Your contribution is greatly appreciated and will assist in the promotion and preservation of the scholarly research output of the University.

Kind regards
Repository Services Team
University of South Australia
Tel: 0702 5110 | Email: ror@unisa.edu.au

The email can be edited and there is an inbuilt 6 hour delay to allow for the time it takes to publish to ROR Discovery to ensure we are not sending a dead link.

Record enhance is another data quality tool.

We can enhance existing low quality records by adding metadata extracted from the Scopus and Web of Science (WoS) APIs to the record in Alma.

Using a DOI will match data from both sources, but will still work if only the WoS and Scopus IDs are available.

The first section displays the existing Alma record.

as well as earlier interglaciations (350 ± 65 ka; MIS 9 or 11 and 470 ± 70 ka; MIS 11 or 13). The coastal barriers have been successively breached by the ancestral River Murray at times of lower sea level during glacial cycles. Former mouths of the River Murray during interglacial sea-level highstands are likely to have existed near Tauwichee Island during MIS 7, and between Goolwa and Hindmarsh Island and near the southern-most part of Lake Albert during the last interglacial (MIS 5e). The River Murray mouth region represents a failed delta as the limited sediment brought to this area since late middle Pleistocene time has been either rapidly incorporated within aeolian deposits during sea-level highstands, or transported to the edge of the Lacedpede Shelf during glacial maxima. The Holocene and modern River Murray has not established a marine delta, but deposits its load in the settling basins of the terminal lakes. Only a small digitate delta has formed where the river enters Lake Alexandrina. © 2009 Elsevier B.V. All rights reserved.

264 _1 |c 2017 |a Nj Usa |b Wiley

300 __ |a 8 pages

520 3 _ |a Copyright © 2016 John Wiley & Sons, Ltd. Background and Purpose: Little has been published about the effectiveness of training postgraduate physiotherapy coursework students in research methods and evidence-based practice (EBP) theory. Graduate qualities in most universities include lifelong learning. Inclusion of EBP in post-graduate coursework students' training is one way for students to develop the knowledge and skills needed to implement current best evidence in their clinical practice after graduation, thereby facilitating lifelong learning. This paper reports on change in confidence and anxiety in knowledge of statistical terminology and concepts related to research design and EBP in eight consecutive years of post-graduate physiotherapy students at one Australian university. Methods: Pre-survey/post-survey instruments were administered to students in an intensive 3-week post-graduate course, which taught health research methods, biostatistics and EBP. This course was embedded into a post-graduate physiotherapy programme from 2007 to 2014. The organization and delivery of the course was based on best pedagogical evidence for effectively teaching adult physiotherapists. The course was first delivered each year in the programme, and no other course was delivered concurrently. Results: There were significant improvements in confidence, significantly decreased anxiety and improvements in knowledge of statistical terminology and concepts related to research design and EBP, at course completion. Age, gender and country of origin were not confounders on learning outcomes, although there was a (non-significant) trend that years of practice
