

# ANZREG Technical Workshop

Rachelle Anne Williams Monash University 14<sup>th</sup> February 2013

#### **Agenda**

- 1 StableLink (PushTo plug-in)
- 2 Excel File Splitter
- 3 Bulk Deletion script

#### StableLink (PushTo plug-in)

 This plug-in enables the user to copy the link of a selected record for bookmarking.

Compatible with Primo 3 and 4.

Copy this URL: (Primo Central Record)

http://search.lib.monash.edu/primo\_library/libweb/action/dlDisplay.do?loc=adaptor,primo\_central\_multiple\_fe&\_vid=MUL&docId=TN\_mla2009441537

Copy this URL: (Australia copy)

http://search.lib.monash.edu/primo\_library/libweb/action/dlDisplay.do?vid=MUL&displayMode=full&docId=catmua1333807

# DEMO

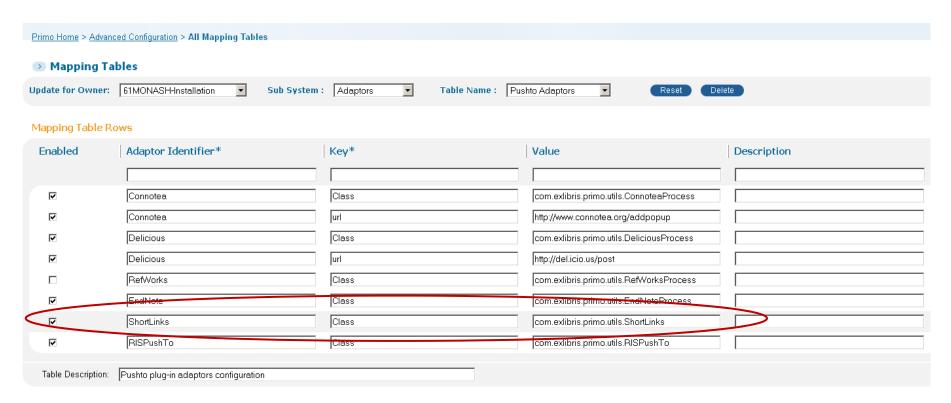

http://monash.edu/library/index.html

- Copy the java code to: (on FE Server)
   /exlibris/primo/p4\_1/ng/primo/home/profile/search/pushTo/StableLink/
- Copy the following Primo jar files to the directory above:
  - primo\_library-common.jar
  - jaguar-client.jar
  - primo\_common-infrastructure.jar
  - xbean.jar
  - javax.sevlet.jar
- Set CLASSPATH to the jar files above before you compile the java code:
   Ex. Setenv CLASSPATH "\${CLASSPATH}:/exlibris/primo/p4\_1/ng/primo/home/profile/search/pushTo/StableLink/xbean.jar"
- Restart the FE Service

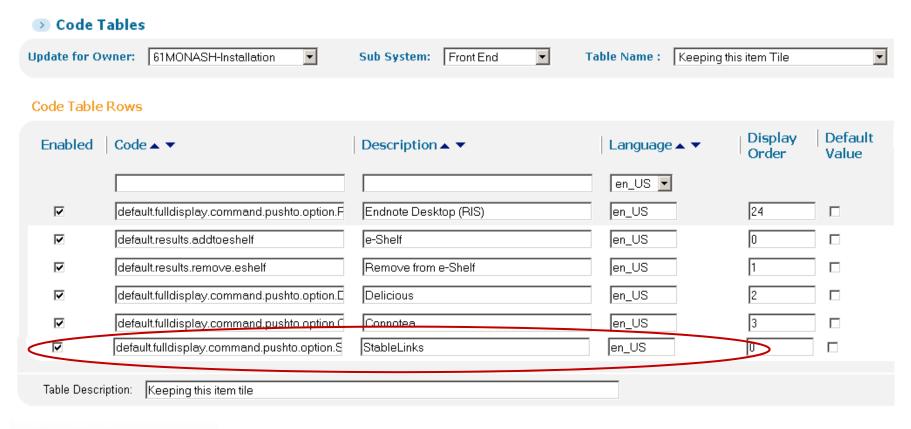

Add the new plug-in to the "Pushto Adaptors" Mapping Table

- To modify the label on the "Send to" dropdown, modify the "Keeping this item Tile" in the Code Tables.
- Deploy mapping & code tables

- Harvesting information from data stored in Excel files.
- Aside from Voyager, Monash stores some inventory information in excel, word and html files. This includes our maps & Asian studies collection.

	Α	В	С	D	E	F	G	Н	1
1	ID	Delete	Scale	Tile	Author	Publisher	Date	Callno	Location
2		FALSE	1:11,000,000	North America	North America Author	National Georgraphic	1952	H.1.T	North America
3	- 1	FALSE	1:10,000,000	Reference Map to North America, 2nd ed.	National Atlas Information S	Geomatics Canada, Nation	1995	H.1.T	North America
4		FALSE	1:5,000,000	Oil and Petroleum Maps of North America	Oil and Petroleum Author	Petromotion	1976	H.1.S	North America
5	DC15	FALSE	none	Confession of Huot Sambath	Huot Sambath	David Chandlrer Cambodia	1976	ASRC-DC15	Albania
6	DC21	FALSE	none	Who are the murderrers of the Khmer People	Sim Kim	Sithan Hin	1988	ASRC-DC21	Cambodia

- Written by Exlibris, available on the El Commons site
- http://www.exlibrisgroup.org/display/PrimoOI/File+Splitter+Plug-In

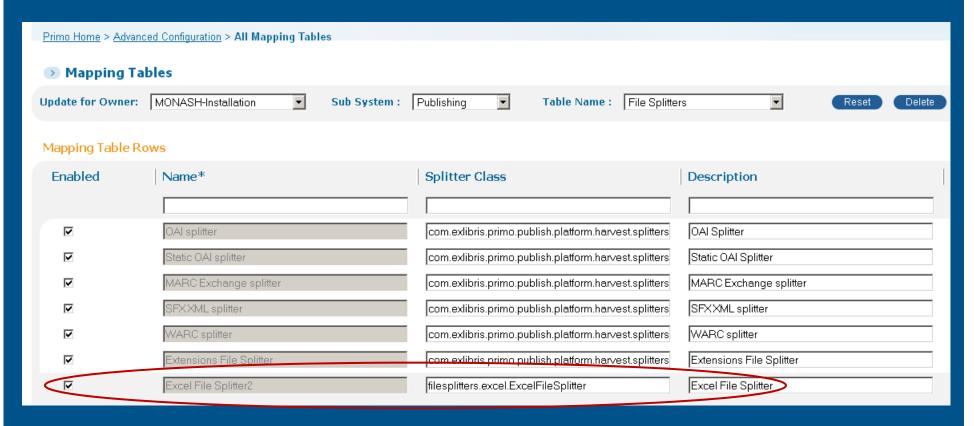

- Implementing it on your BO server:
- 1. Copy 3 files
  - 2 JAR files (excel.jar and jxl.jar)
  - The Excel file splitter JAVA code.
- 2. Compile the Excel file splitter and wrap it as a new JAR file.
  - seteny CLASSPATH

"\${CLASSPATH}:/exlibris/primo/p4\_1/ng/primo/home/profile/publish/publish/product ion/conf/fileSplitter/lib/"

- javac ExcelFileSplitter.java
- jar cvf filesplitters.jar filesplitters
- 3. Place all the 3 JAR files under:
  - \$primo\_dev/ng/primo/home/profile/publish/publish/production /conf/fileSplitter/lib/

Register the Excel File Splitter and Deploy changes

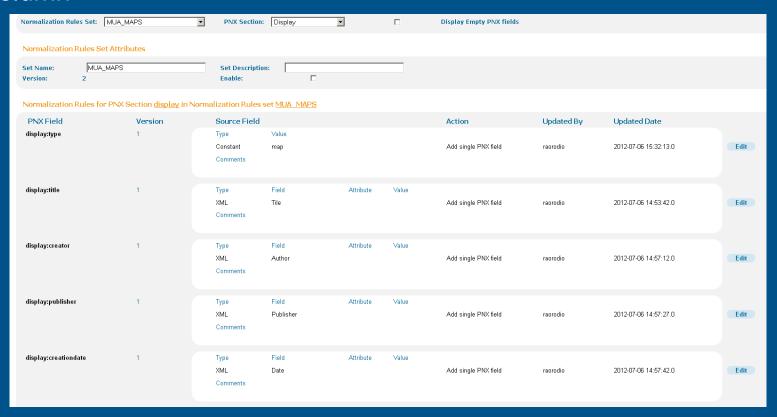

Test if the Excel File Splitter works

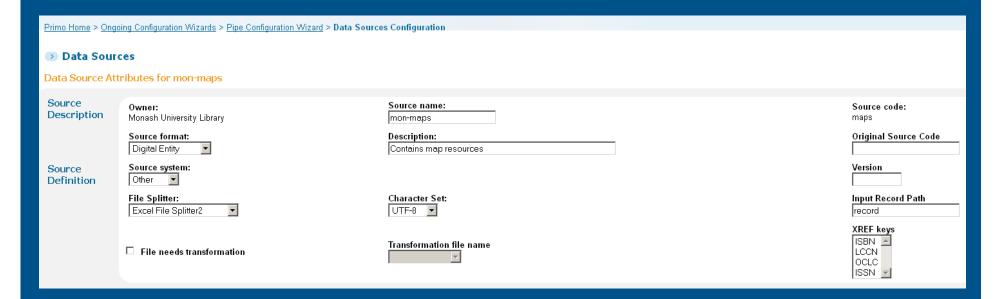

Create a Normalization Rule and map the XML field to the Excel column

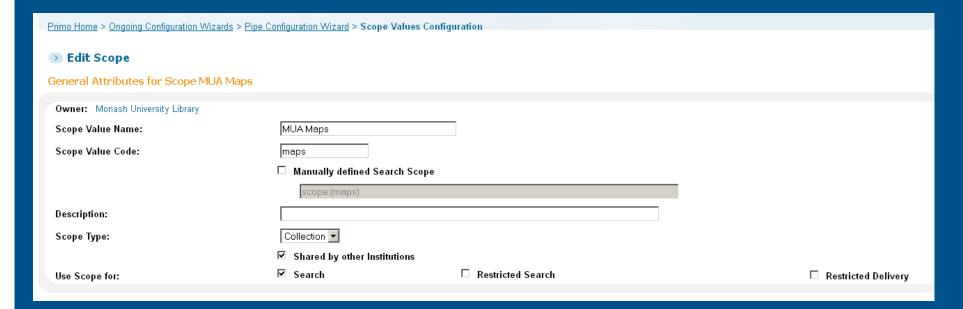

Create a data source to identify the records

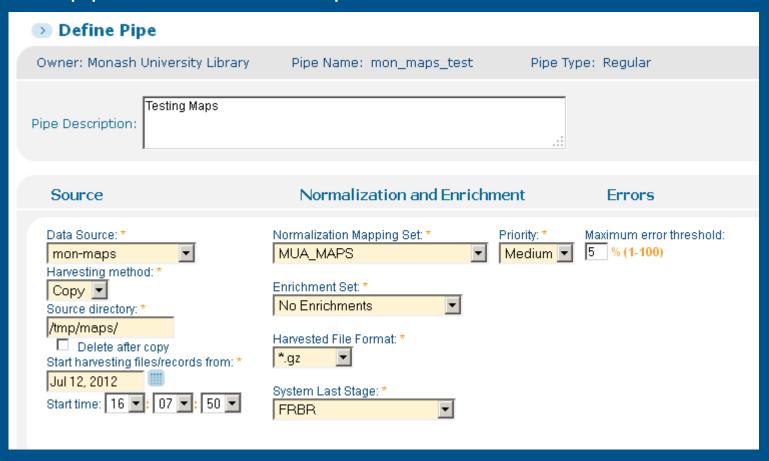

Create a new scope

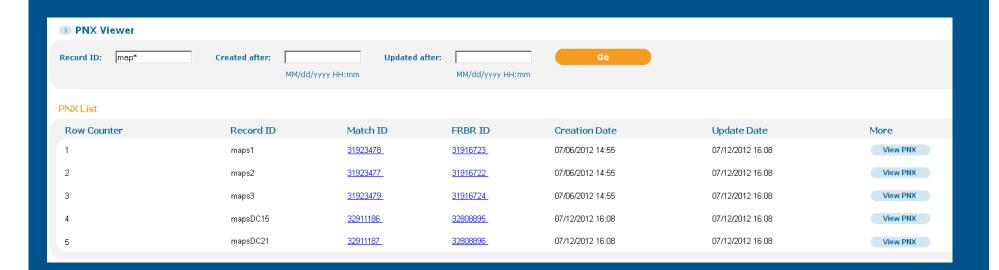

Create a pipe to harvest the map information from the Excel file

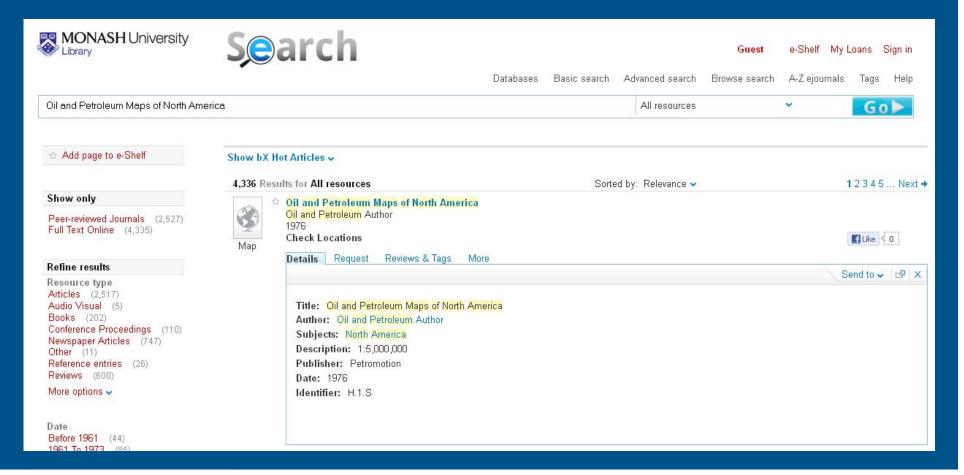

Run Harvesting, Indexing & Hotswappping process

Search will result to

#### **Bulk deletion script**

#### PRIMO Data Source:

primopnx1001 primopnx1002 primopnx1003 primopnx1004 primopnx1005 primopnx1006 primopnx1007 primopnx1008 primopnx1009 primopnx1010

- ■I want to delete multiple BIBIDs from a data source, what do I do?
- ■Specify the BIBIDs for deletion.

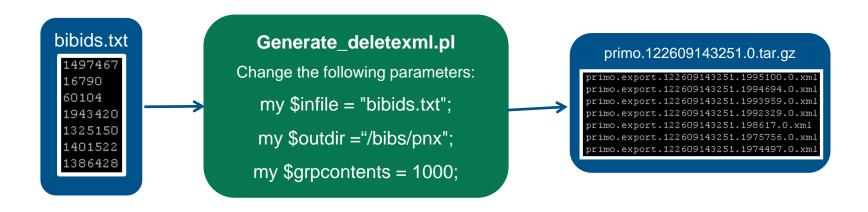

# Delete the following BIBIDs 1003 1005 1006 1008

1010

#### **Bulk deletion script**

- This Perl script is used to delete a number of BIBID's from an existing data source.
- It requires a text file which contains a list of BIBID's.
- Produces a tar file containing 1000 xml files for each group.

#### XML File for Harvesting

XML Filename syntax: primo.export.YYDDMMHHMMSS.BIBID.GRPID.xml

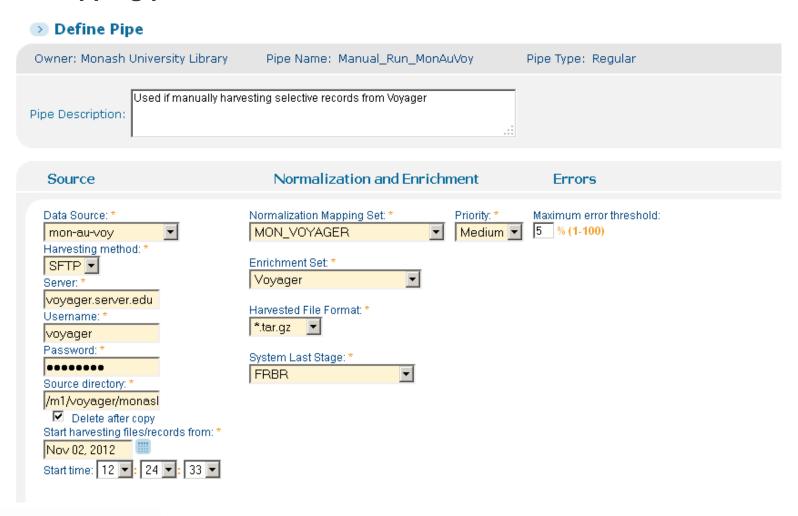

ex. primo.export.121405130000.3182266.0.xml

XML File contents

```
<OAI-PMH xmlns="http://www.openarchives.org/OAI/2.0/" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
        xsi:schemaLocation="http://www.openarchives.org/OAI/2.0/ http://www.openarchives.org/OAI/2.0/OAI-PMH.xsd"
 <ListRecords xmlns="">
   <record>
    <header status="deleted">
      <identifier>
       3182266
      </identifier>
      <datestamp>
       2012-14-05T13:00:00Z
      </datestamp>
    </header>
    <metadata/>
   </record>
 </ListRecords>
```

# Process the \*.gz files through a "Regular Pipe", then run an Indexing & Hotswapping process after.

# Thank you!
