

# Using APIs to enhance the User Experience

ANZREG 25 October 2019  
Developers Day

Euwe Ermita, Manager Digital Library Systems and Services

State Library of New South Wales

# Systems implementation timeline

## Ex Libris Primo

Discovery, end user search and content delivery

↓ Harvests record metadata

### Ex Libris Alma

- Collection Management Print and Electronic resource management
- Authority control
- Serials management
- Fulfillment

↓ Harvests record metadata

### AdLib

Hierarchical archival collections and findings aids management, circulation, tracking and display for both digital and physical objects

↕ Published record linked to digital asset

↕ Unpublished/archival record linked to digital asset

## Ex Libris Rosetta

### External collection viewer

Viewers for images, Downloads for PDFs, ePubs

## VIEW MEDIA FILES

## BROWSE COLLECTION HIERARCHY

### [-] Aggregated collection ( Contains 96 series )

Sir Joseph Banks Papers, 1767-1822. Includes some papers of Sarah Sophia Banks, 1766, 1773-1774, 1779; and Dorothea, Lady Banks, 1817-1822. |

Series 01: Journal of an excursion to Chatham, Rochester, Sheerness and Sheppey, 21 [February] - 4 March 1767 | SAFE/Banks Papers/Series 01.01 (Safe 1 /457)

Series 02: Journal of a tour in Holland, 12 February - 22 March 1773 | SAFE/Banks Papers/Series 02.01 (Safe 1/457)

### [-] Series ( Contains 2 items )

Series 03: Joseph Banks - Endeavour journal, 25 August 1768 - 12 July 1771 |

Series 03. 01: Volume 1: Joseph Banks - Endeavour journal, 25 August 1768 - 14 August 1769 | SAFE/Banks Papers/Series 03.01 (Safe 1/12)

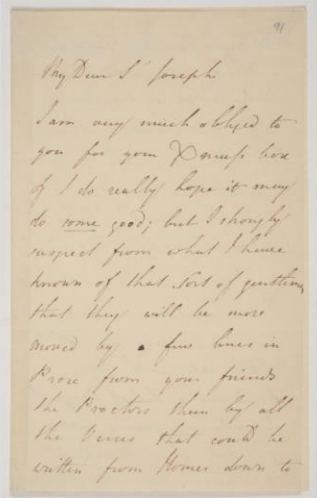

### [+] Item ( Contains 1 Part )

Series 03. 02: Volume 2: Joseph Banks - Endeavour journal, 15 August 1769 - 12 July 1771 | SAFE/Banks Papers/Series 03.02 (Safe 1/13)

Series 04: Notes possibly concerning publication of the account of the voyage of HM Bark Endeavour, James Cook, undated. | SAFE/Banks Papers/Series 04.01 (Safe 1/457)

# But reader experience is still inconsistent...

# Challenges

---

- User experience - Fractured journey across catalogues
- Hierarchies of Archival collections not in Primo. Archival catalogue not easy to navigate.
- Findability – Lack of Google indexing of Primo
- Customisation of interfaces – limited or restricted
- System performance – slow for large collections
- Downtime – release updates across products (monthly, quarterly), breaking changes

# Options...

```
Switch ($recommendedOption) {  
  
    case "doNothing" :  
        /* manage expectations of our users/readers */  
        break; // and hide from users  
  
    case "continueConfiguringOOTBInterfaces" :  
        /* are we at the point of diminishing returns?? */  
        break;  
  
    case "decoupleUserInterfaces" :  
        /* Decouple monoliths – Systems of Records from UI */  
        initiateProject();  
        break;  
  
    default:  
        echo "Analysis paralysis";  
}
```

# Application Portfolio Management Strategy: Pace Layering

"I don't know exactly what I want. I need to experiment."

**Systems of Innovation**

"I know exactly what I want, but it needs to be different from my competitors."

**Systems of Differentiation**

"I know exactly what I want, and it doesn't have to be unique."

# Application Portfolio Management Strategy: Pace Layering: Service Layer

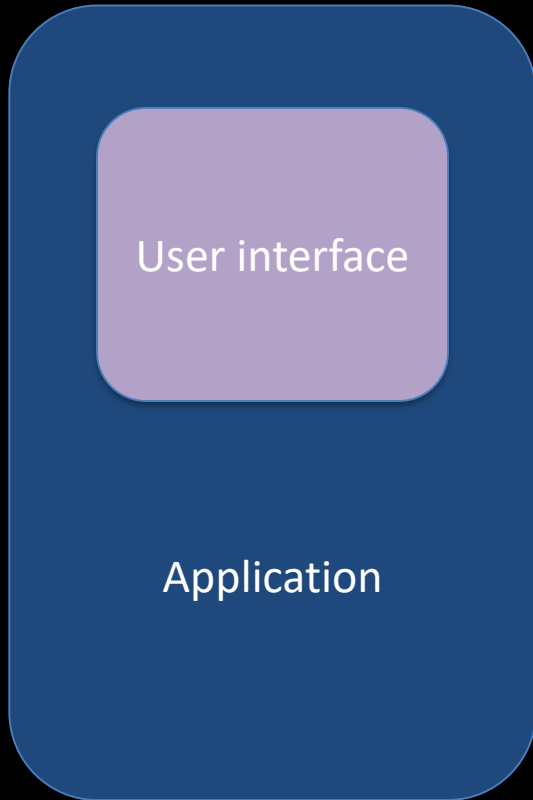

# Application Portfolio Management Strategy: Pace Layering: Service Layer

Category	Attributes	Systems of Record	Systems of Differentiation	Systems of Innovation
General Principles	Driving Force	Common Ideas	Better Ideas	New Ideas
	Business Processes	Well-understood, highly integrated and commoditised, interdependent, stable	Well-understood, highly configurable and customisable; autonomous	Unique, not well-understood, experimental, ambiguous, dynamic and ad hoc
	Pace of Change	Slow, infrequent, incremental; changes every six to 12 months	Moderate, more frequent, configurability is key - Changes every three to six months	Rapid, frequent and ad hoc; "throwaway" customisation; changes weekly, sometimes daily
	Security	Tightly controlled, managed complexity	Distributed control, manageable complexity	Federated control, high potential complexity
	Lifetime - how long it usually stays in that layer	More than 10 years	Two to five years	Three to 12 months
	Planning Horizon - How long you describe the plan in application strategy	More than 7 years	One to two years.	As long as six months
Business Aspects	Strategic Focus	Standardisation: operational efficiency. "Run the business"	Agility/flexibility; competitive differentiation; "Grow the business"	Disruptive thinking; alternative business models, market leadership; "Transform the business"
	Stakeholders/Ownership	High business executive engagement and alignment between business and IT strategy; low end-user engagement; formal handover from business to IT	High business executive engagement, but driven by lines of business; moderate end-user engagement; business engaging on hot spots and IT filling the gaps	Moderate business executive engagement, some sponsored and under-the-radar, tactical; high end-user engagement
	Data/information	Highly structured, well-managed	Internal and external, some unstructured; more dynamic	Structured and unstructured data; heavy reliance on external data
	Risk	Minimum	Medium	High

# Monolithic vs decoupled interfaces

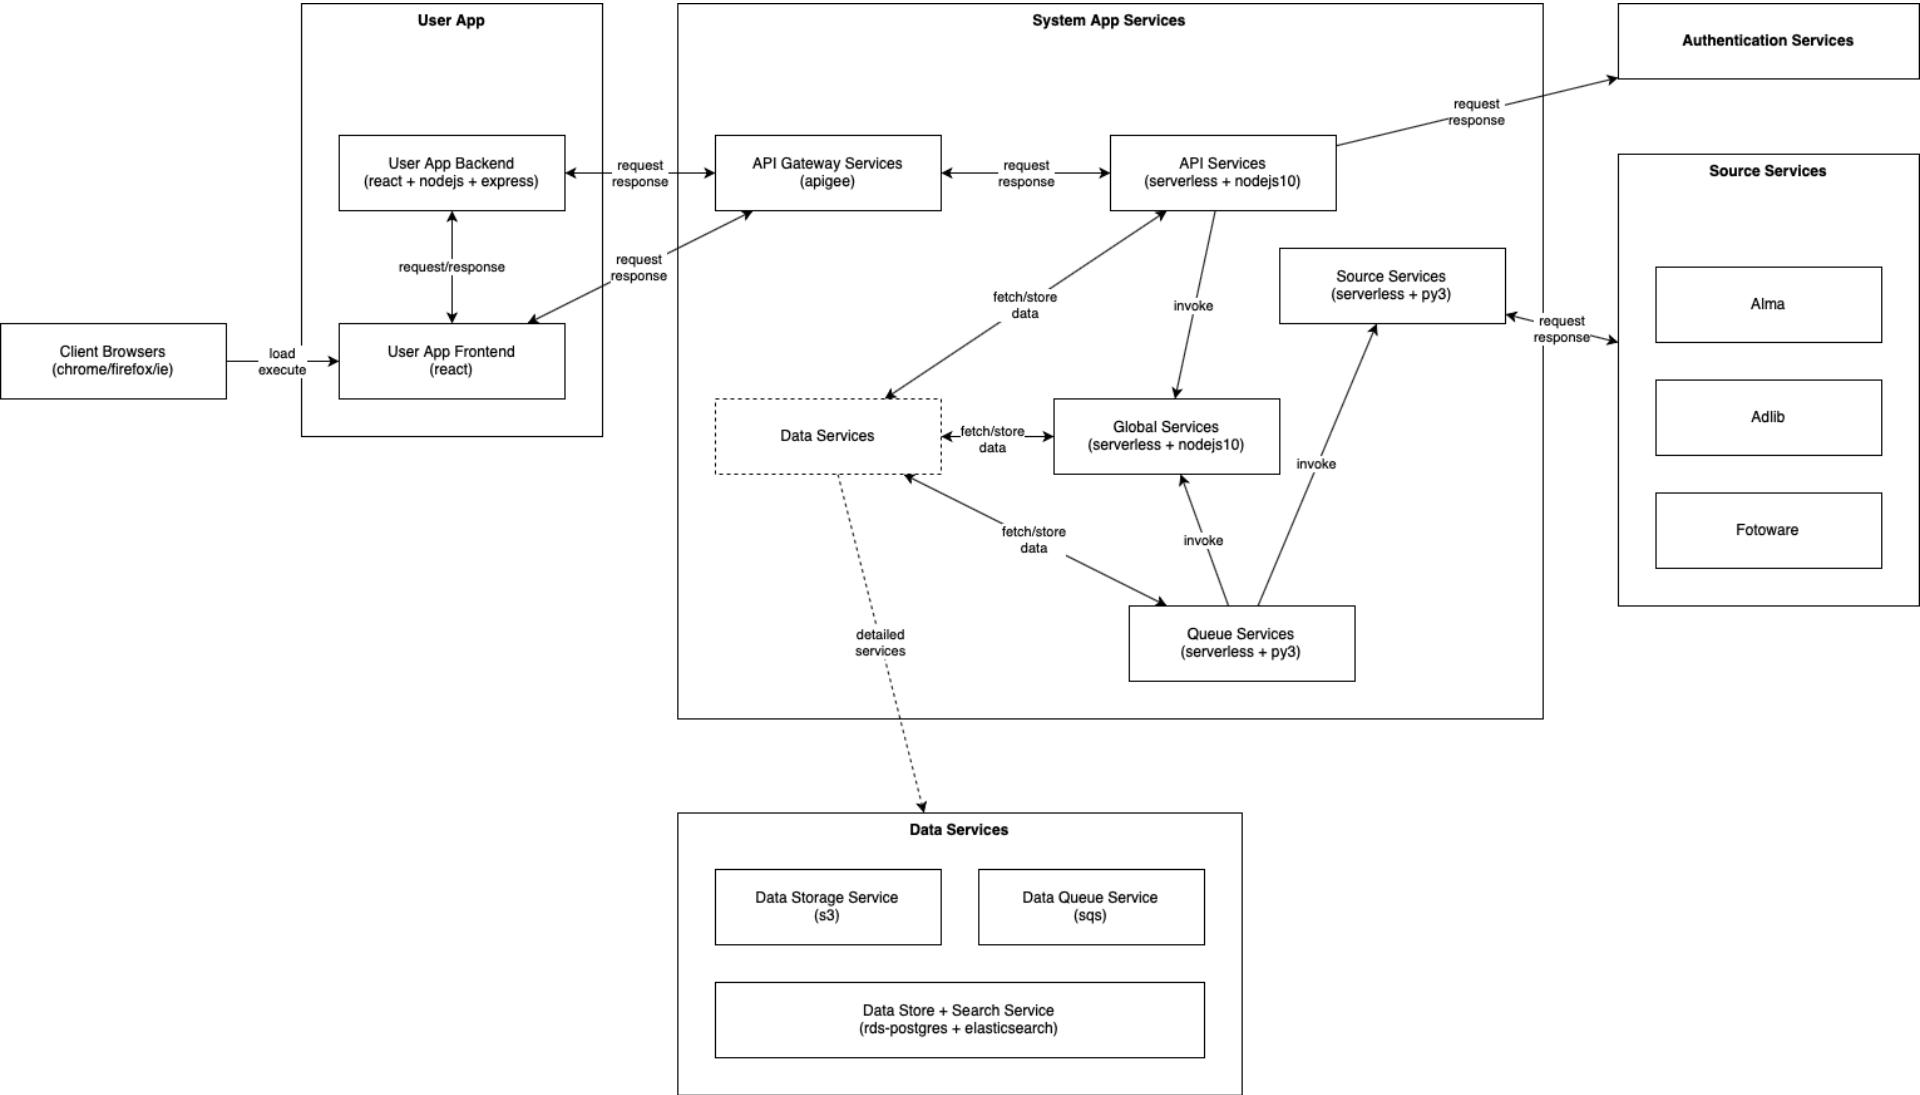

Monolithic applications

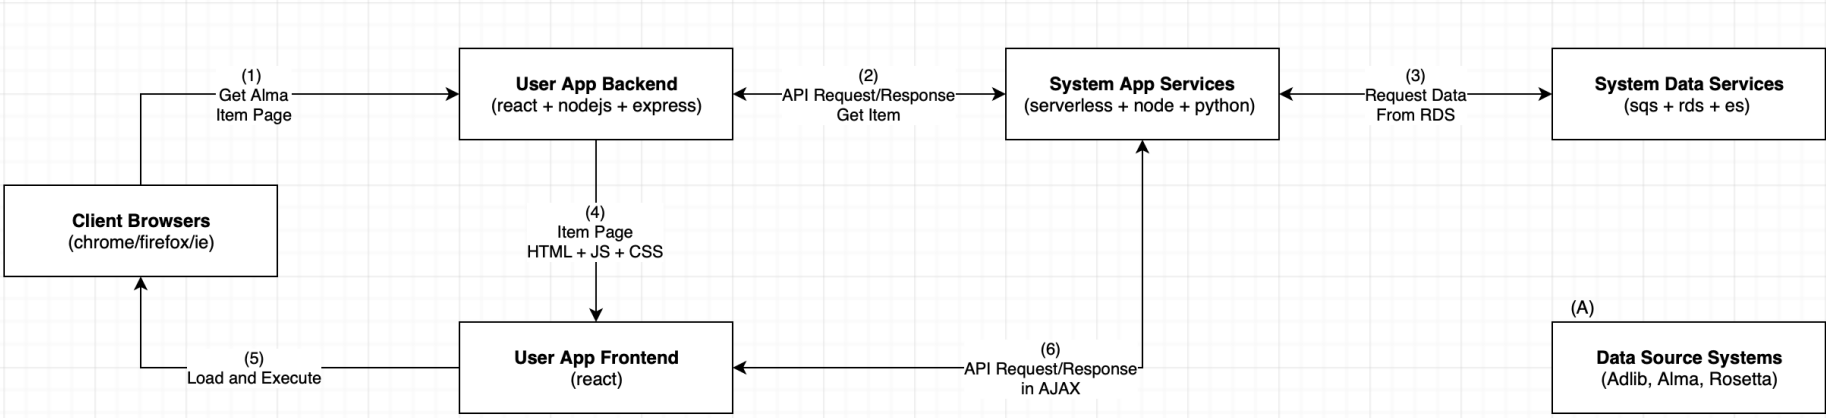

Decoupled application

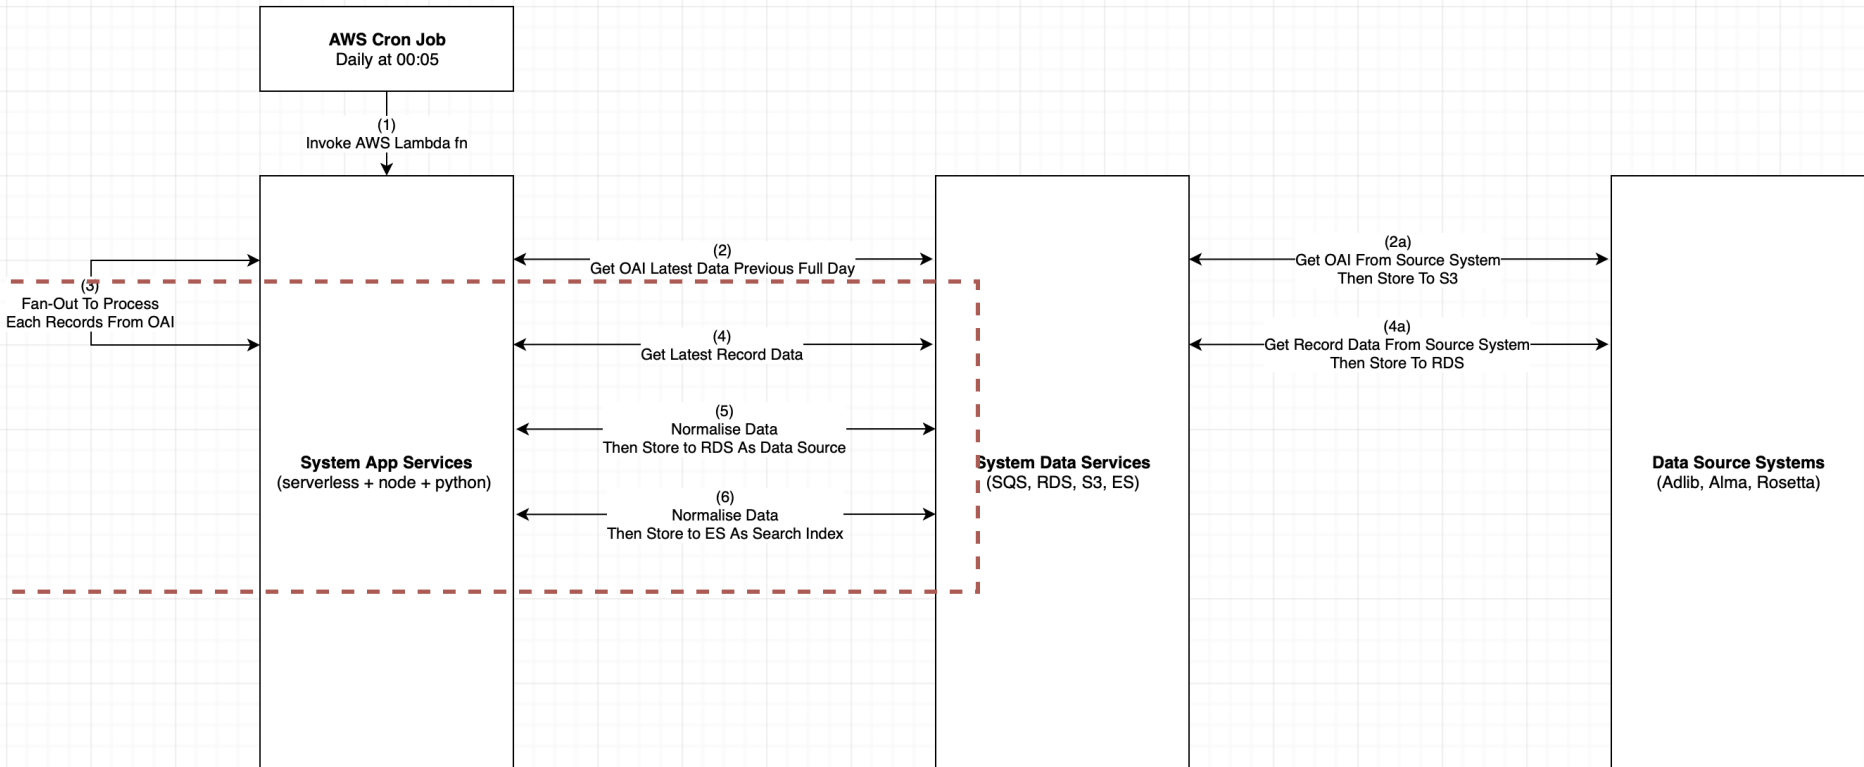

# User Experience - headless architecture

# User experience APIs – Get Record

# User experience APIs – Data Ingestion

# API Management - Apigee

- One of Apigee's top features is the Response Cache:
  - API responses are stored in Apigee "forever"
  - Subsequent responses are returned from Apigee, skipping "round trips" to back end systems
  - Responses are hundreds of times faster
  - Back end systems avoid traffic / load
  - Entries are refreshed when data is updated

## Response Time

 AVERAGE TIME WITH CACHE  
4.53 ms

 AVERAGE TIME  
816.84 ms

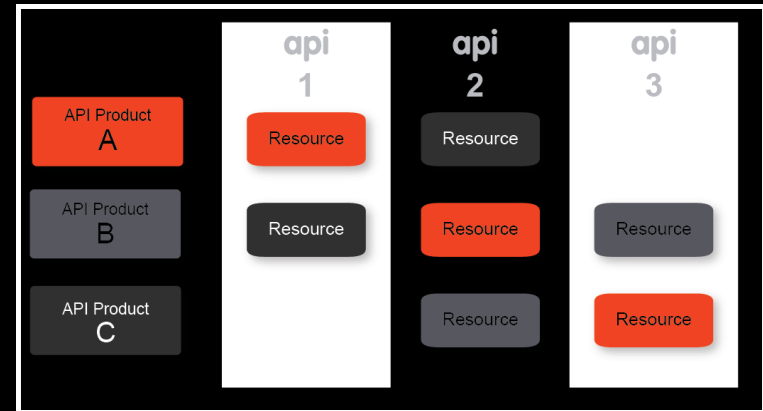

CACHE IMPROVEMENT

180.21 x Faster

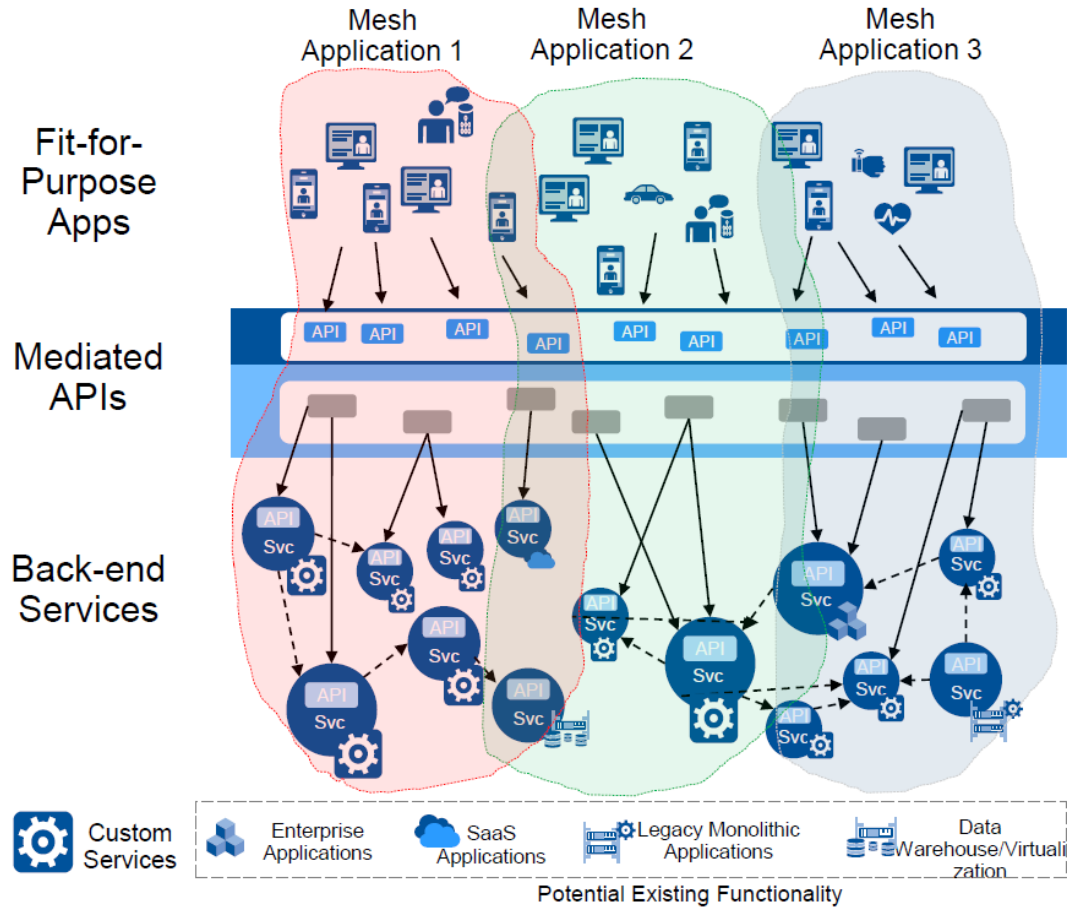

# Benefits of API mediation

- The architecture can be extended to other systems within the organization
- Services can be made available as required through the API, in the proper context
- API products can be created by grouping together API resources
- API consumers can be assigned access via API products
- Analytics can highlight API usage, and target areas of improvement
- The goals are to create a unified customer experience for the organisation, and make the library's data available

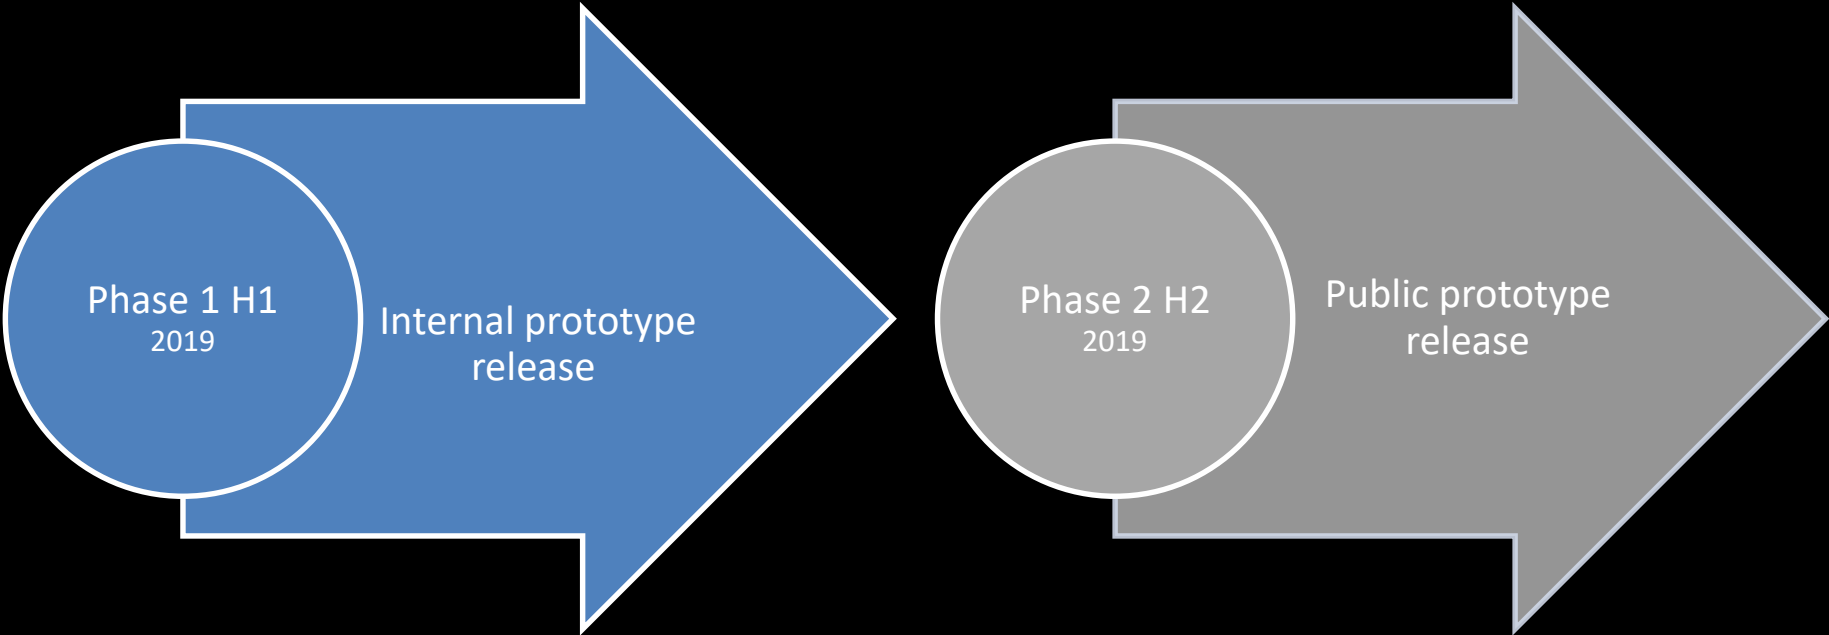

# API Architecture - future

## MASA: Mesh App and Service Architecture

# Roadmap API and UI release – FY 19/20

# Takeaways

- Implement an application strategy - use systems for their strengths; data & information
- Don't over customise/configure systems of record— creates technical debt
- Investigate service abstraction (micro/macro services) to improve system availability
- API mediation/management for interoperability, performance and automation
- Focus on alignment of technology with business strategy

---

# Thank you
